A Pipe, or Butt, of Wine, 120 Gallons.  
A Last of Corn, 10 Quarter, or 60 Bush.  
A Ton of Iron, 20 Hundred Weight, or 2240 lb.  
A Fodder of Lead, 19  $\frac{1}{2}$  Hundred, or 2184 lb.  
A Tod of Wool, 28 lb.  
A Sack, 364 lb.  
A Last, 4368 lb.
- 

# To the READER.

R E A D E R,

**T**HE several TABLES that have been Calculated of this Kind (tho' very Imperfect) have met with a General Acceptation, and we are no less assured of a Kind Reception (from all Traders especially) of These following, being more Compleat than Any yet Extant, and more Care hath been taken than Usual, to have them very Correct; for as other Tables begin at One Farthing, and so on by the Addition of One Farthing until you come to One Shilling, and from One Shilling to Ten, by the Addition of One Penny, and from Ten Shillings by the Addition of Six Pence, until you come to One Pound: We have, in Our TABLES, not only begun with One Farthing, and continued down so to One Shilling, but we have from One Shilling to Ten, continued our TABLES down by the Addition of One Half Penny, which is more than any others have done; and from Ten Shillings to One Pound, by Six Pence. We have, at the Foot of each Table, set down the Great Hundred, viz. 112<sup>lb</sup>. which most heavy Goods are Bought by; also the Gross, viz. 12 Dozen, which Gloves, Buttons, &c. are used to be Bought by; also the Weigh of Cheese and Salt, &c. which is 256, as is usually Sold; you have also the Days of the YEAR, by which you may know your Expences, or Wages, and the Feet in a Solid Rod of Brick Wall, being 272.

These are Things of General Use to be Known by Tradesmen of all SORTS, which renders This BOOK more Compleat than Any of This Kind.

## *The USE of this TABLE.*

**I**F You Buy any Thing by the *Long Hundred*, accounting 112 Pounds to the Hundred, and would know, by the *Pound*, what the *Hundred* is valued at, Observe the following DIRECTIONS, as in

### *Example I.*

IF You Buy Goods at 4 Pence, 3 Farthings, the *Pound*, Look in the *Table* for 4*d.* 3*q.* in the first Column, and against it in the second Column you will find 2*l.* 4*s.* 4*d.* And so much, at that *Rate*, 112 Pounds come to.

### *Example II.*

IF 1 C weight, or 112 Pound, cost 4 Pound, 1 Shilling, 8 Pence; To know how much it is by the *Pound*, look 4*l.* 1*s.* 8*d.* in the fourth Column of the *Table*, and right against it, in the Column next the Left-Hand, you may find 8*d.* 3*q.* and so much, at that *Rate*, it comes to by the *Pound*.

Again; If You Buy One Hundred Weight of Goods, for 4 Pound, 1 Shilling, 8 Pence, and *retale* it at 10 Pence the *Pound*, it comes to, at that *Rate*, 4*l.* 13*s.* 4*d.* Then take 4*l.* 1*s.* 8*d.* from it, and you will find yourself, by the *Remainder*, 11*s.* 8*d.* Gainer, &c. And, in this Manner, you may, with much Ease, Calculate any Quantity, according to the *True Value*, contained in this TABLE.

1000	76	14	3 0	10	3	6 3	2	14	9 0

\* In these Two Tables, the Month is of 28 Days.

## USE of the following TABLES.

**EXAMPLE.** If 1 Yard of *Tape* cost 5 Farthings, or 1 Penny Farthing, What will 46 cost? Turn to the Table of 5 Farthings, and on the Top of the Column, under *N*, you will find 46, against which you will find 4 s. 9 d. 2 q. Or, if you will know what 46 Ells come to, or, 46 Yards of any Thing, or, 46 Pints, or, 46 Ounces; so, likewise 46 Pounds, at 5 Farthings the Pound, come to the same Sum, viz. 4 s. 9 d. 2 q. or, 46 Gross at 5 Farthings the Gross, come to the same 4 s. 9 d. 2 q. so also, 46 Days in the Year, at 5 Farthings the Day, come to 4 s. 9 d. 2 q.

**Example II.** I would know what 112 Pound of Tobacco-dust will come to at 6 d. a Pound? Look on the Top for 6 d. and you will find the *Great Hundred* at the Bottom 112 | 2 16 0, and the *Gross* which is 144 | 3 l. 12 s. 0 d. The *Weigh* 256 | 6 l. 8 s. 0 d. The *Days in the Year* which are 365 | 9 l. 2 s. 6 d. *Feet in a Rod*, which are 272 | 6 l. 16 s. 0 d. and so much each comes to.

*A General Rule to know if the Numbers in this Book are Truly Printed.*

**Example.** Suppose this Question: At 7 Farthings the Pound, What will 97 Pound Cost?

The *Answer*, by the *Table*, will be 14 Shillings, 1 Penny, 3 Farthings; and, that This is the *True Resolution*, I thus prove.

		<i>l.</i>	<i>s.</i>	<i>d.</i>	<i>q.</i>

*The Use of the following* TABLE  
of DAYS.

**T**HE USE of this TABLE will easily appear from the following *Examples*.

As, Suppose the *Number of Days* betwixt the 4th of *February*, and the 4th of *September*, were required; Looking in the Column under *February* for *September*, against that Month will be found 212, the *Number of Days* betwixt the said Times: So again, From the 8th of *June* to the 8th of *October*, appears by the TABLE to be 122 *Days*, that being the *Number* against *October* in the Column under *June*.

BUT, If the given *Days* are different, 'tis only adding, or subtracting their *Inequality* to, or from the *Tabular Number*.

THUS, Had the First *Example* been from the 4th of *February* to the 8th of *September*, it had been 4 *Days* more than 212, viz. 216: Or, Had the Time in the last *Example* been from the 8th of *June* to the 4th of *October*, it had been 4 *Days* less than 122, viz. 118.

TABLE, shewing, by Inspection, the Number of Days, from any Day in any Month, to the same Day in any other Month.

from Janu.	Febru.	March	April	May	June	July	August	Sept.	Oct.	Nov.	Dec.
